REFLECTIVE BARRIER TAPE

Traffic Tech's Reflective Barrier Tape is a real innovation in work site safety, especially in situations that require the security of the site over night.

Anyone who has a need to reduce risk in dangerous areas of any kind, especially at night or in bad weather conditions when visibility is limited should consider this tape.

PRODUCT BENEFITS:

- **Visibility:** Perfect visibility at night and in bad weather conditions
- **Reflection:** Patented system with long-life, non-removable grey reflective strips, printed directly on the tape.
- **Raw material:** High quality polyethylene, strong and resistant to fading.
- **Appearance:** Sharp bright colours, look great, especially with a personalized logo (ex. NSW Police, Fire, Joe's Plumbing, etc.)
- **Packing:** Easy to store and ready to use from its dispenser box.
- **Patent:** We are the sole Australian and New Zealand importers of this product, with patents both at a national and international level.
- **Price:** Is little more than that of conventional tapes.

How the reflection works:

The reflection is the grey part of the tape. To test it, put the tape at a height of about 1 or 1.5 metres and direct the car lights on the tape surface, from a distance of about 100m to 200m. The reflective part will light up.

Retro-reflective features

Percentage of retro-reflected light	90%
Refraction Index	HIR 1.9-2.2
Divergent Refraction Angle	Max 20%
Night Visibility	200-250 metres
Luminance Factor	15-40 cd/m ²
